

Prevent FISTULA

Continuous leakage of urine, feaces or both from the private parts after a difficult delivery

- 1 Advise parents to give the girl child proper nutrition for normal growth**
- 2 Provide accurate information on antenatal care findings, eg. the lie of the baby; signs of danger in pregnancy, labour and delivery to the women and partner**
- 3 Ensure proper management of labour**
- 4 Discuss with the pregnant woman the delivery and emergency preparedness plan**
- 5 Refer pregnant women with identified problems to facilities which can provide comprehensive care**
- 6 Insert urethral catheter in a woman with prolonged labour**
- 7 Treat women with respect and ensure privacy**
