In addition to their community based reintegration, they are conducting Community Sensitzation on Fistula; Fistula Outreach Services take place at the health centre in which the outreach is located at least once in a year. Development partner support includes support for an expert fistula team (surgeon, nurse and anesthetist); provision of necessary medical equipment and supplies; and training of additional visiting surgeons (at Mable and Kisiizi Hospitals, on-site surgeons are trained by AMREF). 3- Mentorship Camps include surgical repair for women with fistula, on-site training and mentorship for fistula repair teams, and provision of necessary equipment including fistula repair kits, operating 2°0'0"S **-**2°0'0"S table and lights. 4- Community Sensitization on Fistula includes information on how a fistula is formed, how to prevent a fistula from occuring, the importance of natenatal care, delivery with a trained health care provider and family planning. 30°0'0"E 34°0'0"E Data Sources: **Partners** Legend Fistula Services **Uganda Overview** Uganda Admin Boundaries - UBOS 2006/2010 Projects Information - Fistula/Uganda - November 2010 **Routine/or Camp Services** Fistula Care/ **National Border** EngenderHealth Map Disclaimer: **District Border** Outreach The boundaries and names shown and the **UNFPA** designations used on this map do not imply official endorsement or acceptance by the **Water Bodies Mentorship Camps** United States Government. **AMREF** Reintegration 25 50 100 **On-site Training Facility Based** Kilometers Terrewode (Community Based) **Community Sensitization on Fistula** Map Prepare Date: November 18, 2010 (USAID/Uganda)
